Emyr

The plan this year as in previous years would be to weed kill at the beginning of April. This would not prevent the playing of sport on the field. The County Council would be requested to verti drain after the 12 April and this would be followed by slitting, sanding and seeding. The field would then be fertilised.

Wyn

Hello Wyn

Thank you for this valued information. Could we ask that you keep us posted on the progress via this email address, so that we can in turn periodically update the relevant parties with regard to each of the stages being completed, with a view to agreeing a return date for the preseason schedule? We've learned that this type of regular communication with the clubs has led to a much better understanding of the processes involved and also serves to ease some of the previous frustrations felt toward the community / county councils by said field users.

Thank you

Em
