Wyn / Alan

Please accept my apologies as we will not be able to attend tonight's meeting due to late developments of commitments.

I had a phone meeting with Sport Wales on Friday to clarify some matters. See attached an update from the LBSA with regards to some of the previous discussions held between us and also surrounding Alan's advice, specifically the email dated March 22 containing a suggested draft letter from the LBSA to Sport Wales. These were the main topics of discussion with the Officer and he gave us a clear way forward in the short term.

We would appreciate it if this could be communicated accordingly in my absence this evening and we'll keep you updated on developments.

Emyr

Thanks for the information stated below but unfortunately this was only received this afternoon.

That does not matter and note that you are in contact with SportWales.

The Lease will convey a 21 year legal interest in the land and whilst SportWales will require proof of this arrangement the organisation must realise that the LBSA and the Council will be faced with legal fees. It is therefore important to ascertain, to some degree, that this scheme is eligible for funding albeit that all SportWales conditions have to be met. At the moment we do not have a firm indication of costs involved, and the account of the information received leaves many questions to be answered.

I am still awaiting to see, as you probably are, the detailed requirements that are written down in the Official Guidance Notes being part of the Application process. Obviously we will have to meet this criteria. Again I refer to my previous discussions with SportWales which suggested a process of first arranging to submit a proposal for the employment of an acceptable Consultancy to advise on the whole process including the availability of Tenders. These Consultants will discuss with you and other interested parties the pros and cons of the various surface materials available and possibly future management.

This will enable a favoured Tender Sum to be the subject of any future Application and aid SportWales and the Council in determining its contribution and funding programme. In my discussions with SportWales this first phase is a fundamental requirement and has to be undertaken prior to the main Application. I assume these requirements have not been changed.

We need official written guidance before we can proceed further - can you register your interest with SportWales which I understand will enable you to download their Application Package.

We must see the written requirements before anything else can be done.

Regards
Alan

Alan

Thanks for your email. Please see attached the document with written guidance for applications.

Just with regard to your question on the following:

Again I refer to my previous discussions with SportWales which suggested a process of first arranging to submit a proposal for the employment of an acceptable Consultancy to advise on the whole process including the availability of Tenders. These Consultants will discuss with you and other interested parties the pros and cons of the various surface materials available and possibly future management.

This will enable a favoured Tender Sum to be the subject of any future Application and aid SportWales and the Council in determining its contribution and funding programme. In my discussions with SportWales this first phase is a fundamental requirement and has to be undertaken prior to the main Application. I assume these requirements have not been changed.

When I put these points and questions to the SportWales Officer on the call, he said this wasn't the case so I can only assume that this has now changed.

We will be publishing a community engagement survey to record feedback on this specific scheme imminently to help us form a plan.

We'll keep you informed.

Regards

Em

Emyr

Thanks for the information and note your comments and those of SportWales.

My remarks regarding the procedure resulted from a telephone conversation with Cerri of Sport Wales and I have no explanation regarding what now seems a different approach. This of course does not matter.

The Application details supplied do not clearly direct a way forward, although you might have a different view.

Fundamentally, it is necessary to ascertain that the MUGA qualifies as an appropriate scheme, which in principle meets the criteria for SportWales funding. Whilst the intention is to provide for all interests described in the document

received I am at a loss to identify a clear way forward at this stage - a critical path from beginning to completion- and assume that you will be given further guidance as you require.

Your decision to prepare a "Community Engagement Survey" is obviously a good start and if I can help in any way please let me know. This document will demonstrate answers to the required criteria which will then presumably lead to further procedures.

BUT FROM THE INFORMATION RECEIVED I DO NOT KNOW.

REGARDS

Alan
